E2KQ-X

Miscellaneous

Ambient Environment

The Sensor may malfunction if subjected to water, oil, chemicals, or condensation by falsely detecting these as sensing objects.

Environment

The E2KQ-X is of water-resistant construction. To increase the reliability of the E2KQ-X in operation, however, it is recommended that the E2KQ-X be protected with an appropriate cover so that the E2KQ-X will be free from sprayed water or machining oil. The cable is not coated with Fluororesin, which must be taken into consideration when installing the E2KQ-X.

Dimensions
